Column Name: Expended
Year: 2002
Field Note:

Funding is unspent in the SSDI grant. Permission has been obtained to carry-over \$48,933.68 toward the SSDI FY02-03 project.

The Wyoming Legislature was very serious in designating TANF funds to a home visiting initiative. Recruitment of staff and clients coupled with the nurse shortage have not grown the program to fully expend the funds during the second year, FY02, of operations.

- Section Number:** Main
Field Name: OtherFedFundsExpended
Row Name: Other Federal Funds
Column Name: Expended
Year: 2003
Field Note:

FY2003 expenditures of MCH Block Grant funds and state funds were used as planned for in the budget. However, in the "other federal funds," we spent significantly less in two areas. Department plans for how our SSDI money was to be used changed dramatically and thus the subsequent awards reduced. The TANF funds were to be distributed to local Health Departments for nurse salaries. Vacancies due to the national nurse shortage are the reason for not spending the full amount budgeted.

FY02 Expenditures; FY04 Budgetd: calculated based on the following formula: I. Calculate Direct Health Care Services by adding: 600 series from CSHCN and Dental Service sub-budgets (Wyoming considers TANF funds (\$1,760,750) expended on home visiting to be "direct service " dollars; that expenditure is not reflected here as part of the federal/state funding partnership) II. Calculate Enabling Services by adding: Perinatal and balance of CSHCN (for care coordination) sub-budgets III. Population Based Services by adding: Child/Adolescent and Genetics IV. Calculate by adding capacity building grants to line 1e from Form 4 and balance of this form's calculation. The LHD capacity grants actually make it possible for local helath departments to provide services across the level of the pyramid. However, for purposes of reporting for this grant, they are typically counted as an infrastructure strategy.

Wyoming's African American/Black population is very small. As a result, even with three years combined, the number of Black infant deaths does not reach 20. Both White and Black IMRs were standardized to US 1998-2000 rates (White = 5.8 and Black =13.8). Standardized ratios were collapsed into three year averages because there were no black infant deaths in 2001 or 2002. Those 3-year ratios were then used to create the black/white infant mortality ratio. The exception to this is 1998, where only a 2-year average was used as 1996 data were not available.

LIST OF MCH PRIORITY NEEDS

[Sec. 505(a)(5)]

STATE: WY FY: 2005

Your State's 5-year Needs Assessment should identify the need for preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children and services for Children with Special Health Care Needs. With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase, list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women, " and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

1. Decrease barriers to health care through state and community capacity building and systems development (increased access).
2. Decrease incidence of low birth weight babies delivered (increased healthy births).
3. Decrease incidence of youth suicide (increased prevention services and access to mental health services).
4. Decrease unintended pregnancy (increased number of abstinence messages targeting teens; increased access to family planning).
5. Decrease prenatal and youth tobacco and other substance use and abuse.
6. Decrease preventable disease, injury and death in our children and youth.
7. Provide care coordination services for at-risk populations including first time teen mothers, high-risk pregnant women, and CSHCN.
8. Increase care coordination services for at-risk population, including pregnant women and CSHCN.

STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET
STATE: WY

SP # 6

PERFORMANCE MEASURE:

Percent of deaths in children ages 1-24 due to non-motor vehicle related unintentional injuries.

STATUS:

Active

GOAL

Reduce the number of preventable child deaths.

DEFINITION

Deaths, other than car crashes (poisoning, falls, fire, drowning, suffocation, firearms, electrocution, equestrian, and head injuries) that could have been reasonably prevented with appropriate interventions.

Numerator:

Number of children 0-24 years of age dying in a calendar year from non-motor vehicle unintentional injuries.

Denominator:

Total number of deaths in children and youth ages 1-24 in the same calendar year.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Wyoming Department of Health's Office of Vital Records is the source of data on child deaths.

SIGNIFICANCE

Unintentional deaths due to nonviolent injuries are the 5th leading cause of death in the US. They are the major cause of disabilities and hospitalization and have a significant impact on health care costs. While the number of children in Wyoming who die is relatively small, it is directly related to the much larger number of children who are harmed by the same cause.

SP # 7

PERFORMANCE MEASURE:

Percent of adolescents using alcohol.

STATUS:

Active

GOAL

Reduce the incidence of alcohol use among teenagers.

DEFINITION

...

Numerator:

The number of high school students reporting alcohol use in the past 30 days.

Denominator:

The number 9th - 12th grade students.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

The Wyoming Youth risk Behavior Survey. NOTE: This survey is conducted of high school seniors every other year in Wyoming.

HEALTHY PEOPLE 2010 OBJECTIVE	
DATA SOURCES AND DATA ISSUES	Wyoming Youth Risk Behavior Survey. NOTE: This survey is conducted only every other year in Wyoming.
SIGNIFICANCE	Tobacco use is considered the chief "preventable" cause of death in the U.S. Smoking has been related to poor academic performance and the initiation of alcohol and other substance use (Johnson, O'Malley & bachman, 1987).

SP # 12

Units: **Text:**

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

The Wyoming Youth Risk Behavior Survey. NOTE: This survey is conducted of high school seniors every other year in Wyoming

SIGNIFICANCE

weight and eating disorders are increasing among adolescents. Promoting positive eating and physical activity patterns are considered preventive for both overweight and eating disorders. The lack of a positive body image can also assist in other types of nutritional disorders. Healthy behaviors during childhood reduce the potential for chronic conditions in later life, such as diabetes, heart disease, cancer, obesity, and osteoporosis. The Wyoming 1999 YRBS Survey indicates approximately 17.4% of students ages 15-18 years old report being overweight at 5.5% and 11.9% are at risk for being overweight. 4% (6% of females and 2% of male) students reported vomiting or taking laxatives one or more times to lose weight or keep from gaining weight. Body image issues will be addressed in the maternal and child health population.

SP # 15

PERFORMANCE MEASURE:

Percent of adolescents using methamphetamine

STATUS:

Active

GOAL

Reduce the incidence of methamphetamine use as well as other illicit drug use such as marijuana and inhalants among teenagers.

DEFINITION

.

Numerator:

The number students in grades 9-12 who report using methamphetamine during the past 30 days.

Denominator:

The number of students in grades 9-12 in Wyoming during the reporting period.

Units: **Text:**

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

The Wyoming Youth Risk Behavior Survey. NOTE: This survey is conducted of high school seniors every other year in Wyoming.

SIGNIFICANCE

Substance use has negative short term and long term behavioral and health effects on adolescents. The younger the person starts experimenting with use of illicit drugs, the more habitual and stronger the addiction becomes and the more difficult it is to stop drug use. 13% of high school respondents to the 1999 YRBS reported they had used methamphetamine at least one.

SP # 16

PERFORMANCE MEASURE:

The percentage of Wyoming counties with access to translation services

STATUS:

Active

GOAL

Increase translation services in order to minimize obstacles to eliminating health disparities.

DEFINITION

Number of Wyoming counties participating in survey.

Units: 100 **Text:** Percentage

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Self reported MCH Syetm survey conducted every two years

SIGNIFICANCE

National data indicate that minority populaitons are more likely to face disparity in health care. Sufficient translation services will: 1) Alleviate barriers for misunderstanding; 2) Promote cross cultural awareness; and, 3) ensure the coordination of needed services to improve healthcare access and participation to enable holistic health care environment.

SP # 17

PERFORMANCE MEASURE:

The percent of infants born preterm (before 37 weeks gestation)

STATUS:

Active

GOAL

To decrease the preterm birth rate.

DEFINITION

HEALTHY PEOPLE 2010 OBJECTIVE

Reduce preterm births to no more than 7.6% of all births.

DATA SOURCES AND DATA ISSUES

Data are from WY vital records.

SIGNIFICANCE

Prematurity/low birthweight is the leading cause of death in the first month of life. In addition to mortality, prematurity is a major determinant of illness and disability among infants, including developmental delays, chronic respiratory problems, and vision and hearing impairment. Field Note:
2003 Vital Records data are not yet available. Wyoming does not have payment source on the birth certificate, nor does it have matched birth/medicaid files. However, funding has been secured to upgrade the vital records system to a web-based system using the 2003 National Birth Certificate, which includes payment source on the birth certificate. The transition should take place 1/1/05.
